Rule of Law Index

VS.

Absence of Corruption

RULE OF LAW AND CORRUPTION

Corruption, when it takes the form of **misuse of state authority** and **resources** for **personal gains**, generally implies a violation of the law of the land. Its antidote, therefore, is the **rule of law** which dictates equality of citizens before law and their entitlement to a **fair trial** and due process in case of any criminal charges or determination of their **civil rights** and **obligations**.

RULE OF LAW NOW

Law is the activity of subjecting human behavior to the governance of rules. The law should theoretically apply equally to **all, rulers and ruled** alive.

Transparency and **strong rule of law** are key to fighting corruption. In a free society each person has a recognized **private sphere**, a **protected realm** which government authority **cannot encroach upon**.
